IMPORTANT NOTICE

This Technical Report has been prepared as prescribed in Canadian Securities Administrators' National Instrument 43-101 ("NI-43-101"), for Castillian Resources Corp (the "Company") by Mr. Douglas A Currie, B.Sc., MAusIMM, President, Gwynva Resources Management Inc ("Gwynva" or "GRM"), the "Author".

The data, information, estimates, conclusions and recommendations contained herein, as prepared and presented by the Author, are consistent with: (i) information available at the time of preparation; (ii) data supplied by outside sources; and, (iii) the assumptions, conditions and qualifications set forth in this report.

This report is intended to be used by the Company, subject to the terms and conditions of professional services contracts, written or verbal, and other terms of engagement between the Company and Gwynva and the Author, who hereby give their consents to the Company to file this report as a Technical Report with Canadian Securities Regulatory Authorities pursuant to provincial securities legislation and any Canadian stock exchange requirements. Except for the purposes legislated under provincial securities law, any other use of this report by a third party is at that party's sole risk.

ACKNOWLEDGEMENTS

The Author acknowledges the assistance of Mr Osvaldo Arce-Burgoa and Mr Pedro Moura de Macedo, geological consultants to the Company, in compiling data and figures for this report and for their input into the discussion of the geology and geological model of the Achachucani Gold Deposit. Mr Gustavo Miranda and Ms Ana Moran, legal consultants to the Company, are also thanked for their review of sections pertaining to Bolivian mining law and Bolivian history.
