

2015 MINERAL RESOURCE ESTIMATE
TECHNICAL REPORT
HOPE BROOK GOLD PROJECT
NEWFOUNDLAND AND LABRADOR
CANADA
PREPARED FOR
COASTAL GOLD CORP.

PREPARED BY
MICHAEL CULLEN, P. GEO.
MERCATOR GEOLOGICAL SERVICES LIMITED
Effective Date: January 12, 2015

TABLE OF CONTENTS

SUMMARY	IX
1.0 INTRODUCTION	1
1.1 General Terms	1
1.2 Scope of Project.....	2
1.3 Site Visits By Author	3
1.4 Abbreviations Used in this Report	4
2.0 RELIANCE ON OTHER EXPERTS	5
3.0 PROPERTY DESCRIPTION AND LOCATION	6
3.1 Exploration Licences and Claims	6
3.2 Mineral Tenure System in Newfoundland and Labrador	10
3.3 Permits Required For Recommended Future Exploration	11
3.4 Royalty Interest Arising From Option to Purchase Agreement	12
3.5 Environmental Liabilities	13
3.6 Availability of Land for Potential Future Site Development	14
4.0 ACCESSIBILITY, CLIMATE, LOCAL RESOURCES, INFRASTRUCTURE AND PHYSIOGRAPHY	16
4.1 Accessibility, Local Resources and Infrastructure	16
4.2 Climate and Physiography.....	21
4.2.1 Climate.....	21
4.2.2 Physiography	21
4.3 Availability of Surface Rights, Power, Water and Personnel	24
5.0 HISTORY.....	25
5.1 Introduction	25
5.2 Summary of Exploration and Mining Histories	25
5.3 Government Reporting, University Theses and Recent Academic Work.....	30
6.0 GEOLOGICAL SETTING AND MINERALIZATION	32
6.1 Geological Setting	32
6.1.1 Tectonic Framework Summary	32
6.1.2 Regional Geology	34
6.2 Mineralization.....	39
6.2.1 Introduction.....	39
6.2.2 Hope Brook Deposit	41
6.2.3 Structural Geology	45
6.2.4 Metal Zonation and Geometry of Gold Distribution	49
7.0 DEPOSIT TYPES.....	52
7.1 Introduction	52

7.2	Summary Description of Hope Brook Deposit	53
7.3	Summary Description of Other Gold Occurrences of the HBGP.....	57
7.4	Deposit Models and Classification.....	57
7.5	Other Appalachian Examples of Avalonian Gold Deposits	60
8.0	EXPLORATION	61
8.1	Introduction	61
8.2	Initial Review of High Grade Mining Potential	62
8.3	Mineral Resource Estimates – February, 2012, October, 2012 and December, 2013 ...	63
9.0	DRILLING	64
9.1	Coastal Gold Programs Between September, 2010 and October, 2013	64
9.1.1	Coastal Gold Program I - September, 2010 to January, 2011	64
9.1.2	Coastal Gold Program II - February, 2011 to December, 2011.....	66
9.1.3	Coastal Gold Program III - February, 2012 to May, 2012	70
9.1.4	Coastal Gold Program IV - November, 2012 to December, 2012.....	71
9.1.5	Coastal Gold Program V - August, 2013 to October, 2013.....	73
9.1.6	Coastal Gold Drilling and Planning Logistics	75
9.2	Historic Drilling By BP and Royal Oak	76
9.2.1	Summary of Historic Drilling Programs.....	76
9.2.2	Summary of BP and Royal Oak Drilling Program Results	77
9.3	Comment on Diamond Drilling Program Results Used in the Current Resource Estimate.....	77
9.4	Vibracore Tailings Drilling Program – September and October, 2013.....	79
9.4.1	Description of Program and Results	79
9.4.2	Comment on Vibracore Program.....	80
10.0	SAMPLE PREPARATION, ANALYSES AND SECURITY.....	81
10.1	Introduction	81
10.2	Drill Core Sampling for Coastal Gold Programs	81
10.3	Drill Core Analysis for Coastal Gold Programs.....	82
10.4	Quality Control and Assurance for Coastal Gold Programs	83
10.4.1	Coastal Gold Programs: September 2010 through July 2012.....	83
10.4.2	Coastal Gold Programs: October 2012 through November 2013.....	84
10.4.3	Independent Check Samples – Fall 2012 and 2013 Core Programs.....	98
10.5	Sample Preparation and Security for BP and Royal Oak Programs.....	99
10.6	Drill Core Analysis for BP and Royal Oak Programs.....	99
10.7	Quality Control and Assurance for BP and Royal Oak Programs.....	100
10.8	Summary Comment on Sample Preparation, Analysis and Security Programs.....	100
11.0	DATA VERIFICATION.....	101
11.1	Review and Validation of Project Data Sets	101
11.2	Site Visits by Mercator.....	102

11.2.1 Summary	102
11.3 Drill Hole Twinning Program	103
12.0 MINERAL PROCESSING AND METALLURGICAL TESTING	105
13.0 MINERAL RESOURCE ESTIMATES	107
13.1 General	107
13.2 Resource Estimation Rationale and Approach	107
13.3 Resource Model Data Set and Validation	108
13.4 Data Domains and Solid Modeling Spatial Constraints	109
13.4.1 Topographic Surface	109
13.4.2 High Grade Domain and Low Grade Domain Solid Models	110
13.4.3 Mafic Dike, Chetwynd Granite, Chetwynd Dike and Northeast Mafic Solid Models	112
13.4.4 Chetwynd Granite, Chetwynd Dike and Northeast Mafic Solids	114
13.4.5 Void Solid Models	115
13.5 Data Analysis	116
13.5.1 Raw Assays Samples	116
13.5.2 Capping of Raw Assay Values	118
13.5.3 Drill Hole Assay Composites	119
13.6 Bulk Density	121
13.7 Variography and Analysis	122
13.8 Search Ellipsoid Dimensions and Orientation	124
13.9 Resource Estimation Parameters and Interpolation	125
13.10 Block Model Setup	125
13.11 Partial Percentage Estimation	126
13.12 Mafic Dike Probability Model	126
13.13 Silicic Percent, Percent Bedrock, and Void Model	129
13.13.1 Silicic Gold Grade Interpolation	130
13.13.2 Mafic Dike Gold Grade Interpolation	130
13.14 Mineral Resource Classification	131
13.15 Mineral Resource Estimate Gold Cut-off Grade	133
13.16 Mineral Resource Tabulation	133
13.17 Block Model Tonnage and Grade Sensitivity	134
13.18 Model Validation	134
13.18.1 Visual Inspection and Global Block Grade Statistics	134
13.18.2 Model Validation: Interpolation Check and Swath Plot Check	137
13.19 Comparison with Previous Resource Estimate	140
14.0 ADJACENT PROPERTIES	142
15.0 OTHER RELEVANT DATA AND INFORMATION	143
16.0 INTERPRETATION AND CONCLUSIONS	144

16.1	Project Scope and Overview	144
16.2	Mineral Resource Estimate.....	145
16.3	Future Deposit Assessment and Property Exploration Requirements.....	147
17.0	RECOMMENDATIONS	149
17.1	Introduction	149
17.2	Recommended Phase I Work Programs	149
17.3	Recommended Phase II Work Programs.....	151
18.0	DATE AND SIGNATURE PAGE.....	152
19.0	REFERENCES	153
20.0	STATEMENT OF QUALIFICATIONS	165
APPENDIX I		168
APPENDIX II		188
APPENDIX III		225
