# 1 SUMMARY

## EXECUTIVE SUMMARY

Scott Wilson Roscoe Postle Associates Inc. (“Scott Wilson RPA”) was retained by Christopher North, Hays Lake Gold Inc. (“Hays Lake”), to prepare an independent Technical Report on the Shoal Lake West Project, called the Duport Project by previous owners, in northwestern Ontario. The report was prepared in support of an Initial Public Offering. The Technical Report conforms to NI 43-101 Standards of Disclosure for Mineral Projects. Scott Wilson RPA visited the property on October 17, 2008. This report has been readdressed to Everton Resources Inc (“Everton”). Based on a review of Everton’s disclosure on the System for Electronic Document Analysis and Retrieval (“SEDAR”) since our report dated November 18, 2008, and discussions with Everton’s management, Scott Wilson RPA considers this report to be current.

On July 9, 2009, Everton announced that it had signed a Letter of Intent (the “LOI”) whereby Everton proposed to acquire all of the issued and outstanding shares of Hays Lake, subject to terms and conditions outlined in the LOI. Everton has requested that Scott Wilson RPA readdress this report to it in order to support its own disclosure. No other changes have been made to this report beyond addressing it to Everton and re-dating it.

Hays Lake signed an agreement with Halo Resources Ltd. (“Halo”) on October 7, 2008, whereby Hays Lake could earn up to a 75% interest in the 110-claim Shoal Lake West Project by issuing 2,000,000 shares upon signing and making staged work expenditures and property payments by October 31, 2012. Hays Lake’s interest would be subject to a graduated net smelter return (“NSR”) royalty based on production levels by virtue of an underlying agreement, a portion of which may be bought out by Hays Lake.

The Shoal Lake West property is located on Stevens Island, Shoal Lake, approximately 45 km southwest of Kenora, Ontario. It comprises 110 claims for a total of 5,229 ha. Gold was discovered in 1896 and the property has been explored sporadically
